

DoD STEM Communications Toolkit

The Department of Defense (DoD STEM) supports educational outreach to increase opportunities for inquiry-based learning and hands-on activities in science, technology, engineering, and mathematics (STEM), particularly for underrepresented groups and military-connected communities. DoD STEM offers programs for students and educators ranging from pre-kindergarten through post-secondary, as well as professional learning opportunities for the current workforce.

Check out this guide to the DoD STEM website, which offers resources for educators, students, and parents to enter the world of discovery that is DoD STEM.
